

BERCOMEX

DUOFLOR AND DUOFLOR XL

DuoFlor and DuoFlor XL

Reliable leaf stripping for every stem

For many years, Bercomex leaf stripping machines have been known for their consistent quality and reliable performance. With the DuoFlor and DuoFlor XL, you choose a solution that fits your type of work and capacity.

The right solution for every leaf stripping task

The DuoFlor is highly suitable for light to medium-duty leaf stripping and offers flexibility in daily use. Depending on the flower type, the machine processes bunches of approximately 15 to 20 stems.

For higher volumes and larger bunches, the DuoFlor XL has been developed. This machine is designed for professional, non-stop leaf stripping and performs best in production environments where capacity and continuity are essential.

Excellent leaf stripping results

The machines operate with rubber brushes rotating at a fixed speed in opposite directions. This ensures stems are carefully cleaned without damage. The result is uniform leaf removal and smooth processing, regardless of bunch size or flower type. Thorn removal is also handled effortlessly.

As brushes are available in different hardness levels, the machine can easily be adjusted to your product. This helps maintain optimal stem quality and prevents unnecessary damage during processing.

Strong, durable and user-friendly

The machines are designed for daily use in practice:

- robust and reliable
- long service life
- low maintenance
- easy brush replacement

PARTNER IN FUTURE INTELLIGENCE

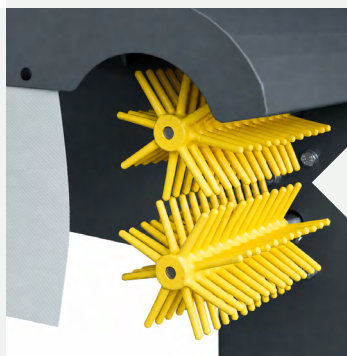

For both large and small leaf stripping tasks

Suitable for light and medium-duty applications, usable per bunch.

Brushes for every flower type

Two brush hardness levels can be used simultaneously, easily adjustable to different flowers without changing brushes.

Excellent leaf stripping results

Rubber brushes clean stems quickly and evenly, maintaining quality without damage.

Capacity and performance

DuoFlor

- Fixed speed: 1500 rpm
- Suitable for up to 15-20 stems
- Maximum bunch diameter: 50 mm
- 2 sets of standard brushes (soft and hard)
- Standard as tabletop model

Dimensions (excluding frame)

Width: 800 mm
Height: 350 mm
Depth: 400 mm

Power supply (for choice)

- 230V - 50Hz - single phase
- 110V - 60Hz - single phase
- Connection with IEC plug, snap-fit
- 0.37 kW

Options:

- Frame with hooks for hanging a waste collection bag. Working height: 900-950 mm
- PVC waste collection bag
- Various types of brushes in different hardness levels

DuoFlor XL

- Fixed speed: 1500 rpm
- Suitable for large bunches up to 25 stems
- Maximum bunch diameter: 85 mm
- 2 sets of standard brushes (soft and hard)
- Working height: 950 mm

Dimensions

Width: 850 mm
Height: 1050 - 1100 mm
Depth: 450 mm

Power supply (for choice)

- 230V - 50Hz - single phase
- 110V - 60Hz - single phase
- Connection with IEC plug, snap-fit
- 0.37 kW

Options:

- Variable speed instead of fixed speed
- Various types of brushes in different hardness levels
